Global warming or we can say “greenhouse effect” the huge universal problem. The exact reasons for it are still unclear, but one of the sure reasons is pollution.

In fact, the pollution was affecting the atmosphere and earth by produces harmful gases and liquids. Although of the different causes of pollution, all of them cause increasing of the earth heat. For example, ice helps earth by reflect radiation from sun, but by the global warming the ice will melt which decrease the amount of reflect radiations.

On the other hand, there is amount of heat which is releasing from earth. Both of these, earth heat and reflect radiation find difficult to pass through the atmosphere layers because of pollution. Actually, pollution makes thick layers in the atmosphere, and that thick layers content by carbon dioxide atoms and

~\*¤®§(\*§ ¤\*~ **About Me** ¤\*~ §\*)§® ¤\*~^°

April 7, 2007 at 10:12 am ([Uncategorized](#))

My name is **Alya**, I am 22 years old. I am studying Medical Laboratory in Abu Dhabi Men's college. In fact, I am a imaginary girl, I have my own world as illogical as movies.

In addition, my friends are very funny and crazy. They like adventures and laughing which makes my life more

interesting.

Moreover, I can describe myself by saying I am a strange and lovely person. Strange girl, because until now I can not understand myself, I have a new personality every day. When I said lovely girl, I mean easy to deal with.

Although I am a lovely person, I am also very nervous, sometimes I have a misunderstanding with a person who is very close to me. I believe we can not know each other until we deal closely.

**We born because we have the will**

The **will**, is the **secret** weapon that we have in our-self, it is a huge store of **energy** that is not oozing away, but it ignores and fills by the negative ideas.

Maybe we sit for hours with our-self and we think... why we are like that? ... Why can not we **change our life**? ... Maybe the memories of the past are suffocating us... And we say for our-self we can not forget.

Return to the past slightly... yes to the past ... you Can not return? ...  
Ok... Stand up and go out from your alienation and consider about that  
incompetent baby who does not amount from the age except a little of the  
months ... look at him ... he has the will ... yes he has.

this the little destitute human has a strong will ... he is able to hold the  
toy in his hand despite failing in a lot of times ... he is able to move his eyes  
and his hands ... he can march despite the pain and difficulties ... he could  
say Mama and Baba ... he able to walk, stand up and speak.

Do not you know? ... This baby, although we laugh from his accent and from  
his walking, he does not despair ... he continues his trajectory ... look at him  
when you laugh at him ... he still in his way despite your laughing.

This person born with the will ... yes this person is you ... you were born  
with the will ...is it enough for you to look in your-self? , how have you  
learned to speak, and the words, how have you learned the calculation ... etc.

My brothers and my sisters we were born to create life with our will ...  
so get up and brush down the dust of despair.
